

19

The diagram shows a horizontal assembly with three main layers: a top layer labeled B, a middle layer labeled C, and a bottom layer labeled D. A circle labeled A is connected to the top of layer B. On the right side, there are two red rectangular blocks. The top red block is attached to the right side of layer B, and the bottom red block is attached to the right side of layer C. There are also some small vertical lines and labels (I, II, III, IV) indicating specific points or connections within the layers.
